Question 1.5.7: Draw a circle with its centre as I (incentre) and radius r (inradius)

Solution: Given,

$$A = \begin{pmatrix} 1 \\ -1 \end{pmatrix} \tag{1}$$

$$B = \begin{pmatrix} -4 \\ 6 \end{pmatrix} \tag{2}$$

$$C = \begin{pmatrix} -3 \\ -5 \end{pmatrix} \tag{3}$$

The incentre of the triangle is:

$$I = \frac{1}{\sqrt{37} + 4 + \sqrt{61}} \begin{pmatrix} \sqrt{61} - 16 - 3\sqrt{37} \\ -\sqrt{61} + 24 - 5\sqrt{37} \end{pmatrix} \tag{4}$$

$$\implies I = \begin{pmatrix} -1.45 \\ -0.78 \end{pmatrix} \tag{5}$$

The inradius of the triangle is:

$$r = \frac{185 + 41\sqrt{37} - 37\sqrt{61} - \sqrt{2257}}{6\sqrt{74}} \tag{6}$$
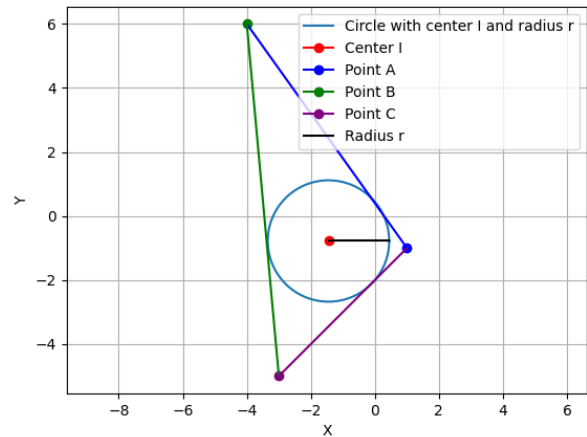

$$= 1.896 \tag{7}$$
